Dedicated professional with experience in planning, designing and building high-quality websites. Proficient in HTML, CSS, Javascript and React.js. Known for being collaborative team player who actively listens, adapts to requirements, and works toward innovative solutions to deliver projects on time. Always eager to learn and grow while contributing to team success.

Work experience

**UI/UX Designer and Frontend Software Engineer** Nov 2022 - Present  
Seek Asia PH, Taguig City

As a Frontend Web Developer and UI/UX Designer my responsibilities are revolving around designing and implementing the User Interface (UI) and user Experience (UX) of website and web applications of our company.

UI/UX Design

- Create wireframes, prototypes, and mock-ups to visualize the layout and flow of the product.
- Design user interfaces that are aesthetically pleasing, intuitive, and aligned with our company brand identity.
- Understand user requirements and conduct research to give a better experience to our user needs.
- Apply **creativity** and **problem-solving skills** to craft innovative designs that meet user expectations.

Frontend Development

- Translate UI/UX designs into interactive and functional web interfaces using HTML, CSS, and JavaScript.
- Ensure the design is responsive to deliver a seamless user experience on different devices.
- Work closely with backend developers to integrate frontend code with server-side logic and APIs while demonstrating **teamwork** and **adaptability**.
- Perform cross-browser and cross-device testing to maintain **attention to detail** and ensure quality assurance.

Collaboration and Communication

- Communicate design ideas and concepts effectively to both technical and non-technical team members using **interpersonal skills** and **emotional intelligence**.
- Be open to feedback and iterate on designs based on the team’s input and user feedback.
- Exhibit **time management** to meet deadlines and prioritize tasks in a fast-paced environment.
- Practice **critical thinking** to analyze feedback and implement solutions that align with business objectives.

Quality Assurance

- Conduct rigorous website testing to ensure functionality, usability, and performance across all supported browsers and devices.
- Identify and resolve bugs or inconsistencies proactively, ensuring the website adheres to the highest standards of quality and user experience.

Education and Qualifications

**Bachelor Science in Computer Engineering** Jun 2017 - Jun 2022  
Jose Rizal University, Mandaluyong City

Proficient in web development and hardware integration, with expertise in designing and developing dynamic web applications and integrating them with systems like Arduino. Skilled in combining software and hardware solutions to create innovative technologies that connect digital systems with real-world applications.
